

StandardPasswordChecker  
::checkStrength

PasswordHasher::initialize

User::setPassword

Terminal::printError

```
graph LR; A[StandardPasswordChecker::checkStrength] --> D[Terminal::printError]; B[PasswordHasher::initialize] --> D; C[User::setPassword] --> D;
```

The diagram illustrates three separate method calls on the left, each represented by a white box with a black border. These calls are: 'StandardPasswordChecker::checkStrength', 'PasswordHasher::initialize', and 'User::setPassword'. Three blue arrows originate from the right side of these boxes and converge on a single gray box on the right labeled 'Terminal::printError'. This visualizes a common output or action (printing an error) triggered by different parts of the system.
